## National Curriculum 2014 Numeracy Objectives

## Number - Number and Place Value

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> count to and across 100 , forwards and backwards, beginning with 0 or 1, or from any given number <br> $\square$ count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens <br> $\square$ given a number, identify one more and one less <br> identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least <br> $\square$ read and write numbers from 1 to 20 in numerals and words. | Pupils should be taught to: <br> $\square$ count in steps of 2, 3, and 5 from 0 , and in tens from any number, forward and backward <br> recognise the place value of each digit in a two-digit number (tens, ones) <br> $\square$ identify, represent and estimate numbers using different representations, including the number line <br> compare and order numbers from 0 up to 100 ; use <, > and = signs <br> $\square$ read and write numbers to at least 100 in numerals and in words <br> $\square$ use place value and number facts to solve problems. | Pupils should be taught to: <br> $\square$ count from 0 in multiples of 4,8, 50 and 100 ; find 10 or 100 more or less than a given number <br> $\square$ recognise the place value of each digit in a three-digit number (hundreds, tens, ones) <br> $\square$ compare and order numbers up to 1000 <br> $\square$ identify, represent and estimate numbers using different representations <br> $\square$ read and write numbers up to 1000 in numerals and in words <br> $\square$ solve number problems and practical problems involving these ideas. | Pupils should be taught to <br> $\square$ count in multiples of 6, 7, 9, 25 and 1000 <br> $\square$ find 1000 more or less than a given number <br> $\square$ count backwards through zero to include negative numbers <br> $\square$ recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) <br> $\square$ order and compare numbers beyond 1000 <br> $\square$ identify, represent and estimate numbers using different representations <br> $\square$ round any number to the nearest 10, 100 or 1000 <br> $\square$ solve number and practical problems that involve all of the above and with increasingly large positive numbers <br> read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. | Pupils should be taught to: <br> $\square$ read, write, order and compare numbers to at least 1000000 and determine the value of each digit <br> $\square$ count forwards or backwards in steps of powers of 10 for any given number up to 1000000 <br> $\square$ interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero <br> $\square$ round any number up to 1000000 to the nearest $10,100,1000,10000$ and 100000 <br> $\square$ solve number problems and practical problems that involve all of the above <br> $\square$ read Roman numerals to 1000 (M) and recognise years written in Roman numerals. | Pupils should be taught to: <br> $\square$ read, write, order and compare numbers up to 10000000 and determine the value of each digit <br> $\square$ round any whole number to a required degree of accuracy <br> $\square$ use negative numbers in context, and calculate intervals across zero <br> $\square$ solve number and practical problems that involve all of the above. |

## National Curriculum 2014 Numeracy Objectives

## Number - Addition and Subtraction

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 (+-x $\div$ combined) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> read, write and interpret mathematical statements involving addition $(+)$, subtraction $(-)$ and equals (=) signs <br> represent and use number bonds and related subtraction facts within 20 <br> add and subtract one-digit and two-digit numbers to 20 , including zero <br> solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7=-9$. | Pupils should be taught to: <br> $\square$ solve problems with addition and subtraction: <br> $\square$ using concrete objects and pictorial representations, including those involving numbers, quantities and measures <br> $\square$ applying their increasing knowledge of mental and written methods <br> $\square$ recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 <br> $\square$ add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <br> a two-digit number and ones <br> a two-digit number and tens <br> two two-digit numbers <br> adding three one-digit numbers <br> show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot <br> $\square$ recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems. | Pupils should be taught to: <br> $\square$ add and subtract numbers mentally, including: <br> $\square$ a three-digit number and ones <br> a three-digit number and tens <br> a three-digit number and hundreds <br> $\square$ add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction <br> - estimate the answer to a calculation and use inverse operations to check answers <br> $\square$ solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. | Pupils should be taught to: <br> $\square$ add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate <br> $\square$ estimate and use inverse operations to check answers to a calculation <br> solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why. | Pupils should be taught to: <br> $\square$ add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) <br> add and subtract numbers mentally with increasingly large numbers <br> use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy <br> solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. | Pupils should be taught to: <br> multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication <br> divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context <br> divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context <br> perform mental calculations, including with mixed operations and large numbers <br> identify common factors, common multiples and prime numbers <br> use their knowledge of the order of operations to carry out calculations involving the four operations <br> solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why <br> solve problems involving addition, subtraction, multiplication and division <br> use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy. |

## National Curriculum 2014 Numeracy Objectives

## Number - Multiplication and Division

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | ear 6 (+-x $\div$ combined) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. | Pupils should be taught to: <br> recall and use multiplication and division facts for the 2,5 and 10 multiplication tables, including recognising odd and even numbers <br> calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division ( $\because$ ) and equals (=) signs <br> show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot <br> solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts. | Pupils should be taught to: <br> recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables <br> write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods <br> solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects. | Pupils should be taught to: <br> recall multiplication and division facts for multiplication tables up to 12 $\times 12$ <br> use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers <br> recognise and use factor pairs and commutatively in mental calculations <br> multiply two-digit and three-digit numbers by a one-digit number using formal written layout <br> solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as $n$ objects are connected to $m$ objects. | Pupils should be taught to: <br> $\square$ identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers <br> Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers <br> $\square$ establish whether a number up to 100 is prime and recall prime numbers up to 19 <br> multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers <br> $\square$ multiply and divide numbers mentally drawing upon known facts <br> $\square$ divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context <br> multiply and divide whole numbers and those involving decimals by 10 , 100 and 1000 <br> recognise and use square numbers and cube numbers, and the notation for squared $\left({ }^{2}\right)$ and cubed ( ${ }^{3}$ ) <br> $\square$ solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes <br> $\square$ solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign <br> $\square$ solve problems involving multiplication and division, including | Pupils should be taught to: <br> $\square$ multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication <br> divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context <br> divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context <br> perform mental calculations, including with mixed operations and large numbers <br> $\square$ identify common factors, common multiples and prime numbers <br> use their knowledge of the order of operations to carry out calculations involving the four operations <br> solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why <br> solve problems involving addition, subtraction, multiplication and division <br> use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy. |

National Curriculum 2014 Numeracy Objectives

## Fractions (inc decimals and percentages)

National Curriculum 2014 Numeracy Objectives

|  |  |  |  | $\square$ solve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,2 / 5,4 / 5$ and those fractions with a denominator of a multiple of 10 or 25 . | between simple fractions, decimals and percentages, including in different contexts. |
| :---: | :---: | :---: | :---: | :---: | :---: |

## Measurement

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> $\square$ compare, describe and solve practical problems for: <br> lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] <br> $\square$ mass/weight [for example, heavy/light, heavier than, lighter than] <br> capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] <br> time [for example, quicker, slower, earlier, later] <br> $\square$ measure and begin to record the following: <br> $\square$ lengths and heights mass/weight capacity and volume <br> $\square$ time (hours, minutes, seconds) <br> $\square$ recognise and know the value of different denominations of coins and notes <br> $\square$ sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening] <br> $\square$ recognise and use language relating to dates, including days of the week, weeks, months and years <br> $\square$ tell the time to the hour and half past the hour and draw the hands on a clock face to show these times. | Pupils should be taught to: <br> $\square$ choose and use appropriate standard units to estimate and measure length/height in any direction ( $\mathrm{m} / \mathrm{cm}$ ); mass ( $\mathrm{kg} / \mathrm{g}$ ); temperature ( ${ }^{\circ} \mathrm{C}$ ); capacity (litres $/ \mathrm{ml}$ ) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels <br> $\square$ compare and order lengths, mass, volume/capacity and record the results using >, < and = <br> $\square$ recognise and use symbols for pounds ( $£$ ) and pence ( p ); combine amounts to make a particular value <br> $\square$ find different combinations of coins that equal the same amounts of money <br> $\square$ solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change <br> $\square$ compare and sequence intervals of time <br> $\square$ tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times <br> $\square$ know the number of minutes in an hour and the number of hours in a day. | Pupils should be taught to: <br> $\square$ measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass ( $\mathrm{kg} / \mathrm{g}$ ); volume/capacity ( $1 / \mathrm{ml}$ ) <br> $\square$ measure the perimeter of simple 2-D shapes <br> $\square$ add and subtract amounts of money to give change, using both $£$ and $p$ in practical contexts <br> tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12 -hour and 24 -hour clocks <br> $\square$ estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight <br> $\square$ know the number of seconds in a minute and the number of days in each month, year and leap year <br> $\square$ compare durations of events [for example to calculate the time taken by particular events or tasks]. | Pupils should be taught to: <br> $\square$ Convert between different units of measure [for example, kilometre to metre; hour to minute] <br> $\square$ measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres <br> $\square$ find the area of rectilinear shapes by counting squares <br> $\square$ estimate, compare and calculate different measures, including money in pounds and pence <br> $\square$ read, write and convert time between analogue and digital 12and 24 -hour clocks <br> $\square$ solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days. | Pupils should be taught to: <br> $\square$ convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre) <br> $\square$ understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints <br> $\square$ measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres <br> $\square$ calculate and compare the area of rectangles (including squares), and including using standard units, square $\mathrm{centr}_{2}$ imetres ( cm ) and square metres ( m ) and estimate the area of irregular shapes <br> $\square$ estimate volume [for example, using 1 cm blocks to build cuboids (including cubes)] and capacity [for example, using water] <br> $\square$ solve problems involving converting between units of time <br> $\square$ use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling. | Pupils should be taught to: <br> $\square$ solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate <br> $\square$ use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places <br> $\square$ convert between miles and kilometres <br> $\square$ recognise that shapes with the same areas can have different perimeters and vice versa <br> $\square$ recognise when it is possible to use formulae for area and volume of shapes <br> $\square$ calculate the area of parallelograms and triangles <br> $\square$ calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic $\operatorname{centimetres~}_{3}(\mathrm{~cm})$ and cubic metres ( m ), and extending to ${ }_{3}$ other units [for example, mm and $\mathrm{km}{ }^{3}$. |

## National Curriculum 2014 Numeracy Objectives

## Geometry - Properties of Shapes

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> $\square$ recognise and name common 2-D and 3-D shapes, including: <br> $\square$ 2-D shapes [for example, rectangles (including squares), circles and triangles] <br> $\square$ 3-D shapes [for example, cuboids (including cubes), pyramids and spheres]. | Pupils should be taught to: <br> $\square$ identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line <br> $\square$ identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces <br> $\square$ identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid] <br> $\square$ compare and sort common 2-D and $3-\mathrm{D}$ shapes and everyday objects. | Pupils should be taught to: <br> $\square$ draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them <br> $\square$ recognise angles as a property of shape or a description of a turn <br> $\square$ identify right angles, recognise that two right angles make a halfturn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle <br> $\square$ identify horizontal and vertical lines and pairs of perpendicular and parallel lines. | Pupils should be taught to: <br> $\square$ compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes <br> $\square$ identify acute and obtuse angles and compare and order angles up to two right angles by size <br> $\square$ identify lines of symmetry in 2-D shapes presented in different orientations <br> $\square$ complete a simple symmetric figure with respect to a specific line of symmetry. | Pupils should be taught to: <br> $\square$ identify 3-D shapes, including cubes and other cuboids, from 2-D representations <br> $\square$ know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles <br> $\square$ draw given angles, and measure them in degrees ( 0 ) identify: <br> angles at a point and one whole turn (total 360o) <br> $\square$ angles at a point on a straight line and $1 / 2$ a turn (total 1800) $\square$ other multiples of 90 o <br> $\square$ use the properties of rectangles to deduce related facts and find missing lengths and angles <br> $\square$ distinguish between regular and irregular polygons based on reasoning about equal sides and angles. | Pupils should be taught to: <br> $\square$ draw 2-D shapes using given dimensions and angles <br> recognise, describe and build simple 3-D shapes, including making nets <br> $\square$ compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons <br> $\square$ illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius <br> $\square$ recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles. |

## Geometry - Position and Direction

| Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pupils should be taught to: <br> $\square$ describe position, direction and movement, including whole, half, quarter and three-quarter turns. | Pupils should be taught to: <br> $\square$ order and arrange combinations of mathematical objects in patterns and sequences <br> $\square$ use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in |  | Pupils should be taught to: <br> $\square$ describe positions on a 2-D grid as coordinates in the first quadrant <br> $\square$ describe movements between positions as translations of a given unit to the left/right and up/down <br> $\square$ plot specified points and draw sides to complete a given polygon. | Pupils should be taught to: <br> $\square$ identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed. | Pupils should be taught to: <br> $\square$ describe positions on the full coordinate grid (all four quadrants) <br> $\square$ draw and translate simple shapes on the coordinate plane, and reflect them in the axes. |

## National Curriculum 2014 Numeracy Objectives

## Statistics

## Ratio and Proportion

```
Year 6
Pupils should be taught to
solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
\(\square\) solve problems involving the calculation of percentages [for example, of measures, and such as \(15 \%\) of 360 ] and the use of percentages for comparison
solve problems involving similar shapes where the scale factor is known or can be found
\(\square\) solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.
```

## Algebra

## Year 6

National Curriculum 2014 Numeracy Objectives
Pupils should be taught to
use simple formulae
$\square$ generate and describe linear number sequences
express missing number problems algebraically
find pairs of numbers that satisfy an equation with two unknowns
enumerate possibilities of combinations of two variables
